DETAILED ACTION

Allowable Subject Matter

1. Claims 1-13, and 15-30 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claims 1, 5, 7, 8, and 19, as set forth in the previous Office Action, Faget et al.'691, the closest reference, and the other prior art do not teach or fairly suggest:

each core comprising a plurality of distributed multi-context storage units comprising: a context register bank; a context identification register; and logic for processing a set of data tokens according to the current context parameter set. (in claims 1, and 5);

the step of: retrieving a set of context parameters corresponding to the current context from each of a plurality of multi-context storage units distributed through the cores (in claim 7);

the first core comprising: a context identification register connected to the input interface; a multi-context

storage unit connected to the context identification register;
and control and processing logic (in claim 8); and

the pipestages including a plurality of distributed multi-context storage units each storing a plurality of context parameters and each responsive to the context identification tokens (in claim 19). Further, the combination of the above limitations with all of the other limitations of the respective independent claims is not obvious.

As to claims 16, 9, 16-18 and 30, Examiner agrees with Applicants that Faget et al.'691 does not teach or suggest a multi-context storage unit, or storing multiple context states in the cores for retrieval upon the receipt of a context identification token as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
